

# What is the Universal Language of Light?

We learn that our pictorial visions, sensations, colour, movement, sound, aroma, shape texture and depth all can be shaped into a geometric symbolic language that translates universal qualities. These symbols become a language we call the Universal Language of Light. This higher consciousness language is embodied through our 6 physical energy vortexes and our etheric crown chakra. When our higher self receives this symbolic coding and translates it into our consciousness awareness, in order in order to speed up our vibrational frequencies on a physical level, we start to activate our Light bodies. Only through our light bodies can we acquire a higher consciousness state in order to understand the different realities during our dream time or meditations.

## How does one interpret their creative expressions?

In the first few exercises in the workbook you gather information from your subconscious as to how your mind interprets your thoughts in colour and line. It has value no matter what. Even if you suspect that your thoughts were still influenced by your intellect. It's not easy to entirely switch off our intellect or reasoning faculty. When we start to interpret our own doodles, honesty is the one requirement. You can choose to go in denial, many do at the beginning, but in the end in order to discover our Soul Purpose you have to be true to yourself. Doodles, art- analogue drawings and symbolic expressions reveal our mental programming patterns. To meditate on these symbols helps you the artist to re-establish the link with your Light body or Spirit.

## What will the Language of Light course do for me?

This mind-drawing course in the Language of Light workbook will help you to gain access, at a conscious level, to your inventive, intuitive imaginative powers that may have been largely untapped by our verbal, technological culture and educational system. Thoughts have colour, shape and sound and through the Art Analogue drawing exercises each participant learns, through their own analogue drawings, why they manifested their life circumstances the way they have.

The colours and symbols we express while we draw with specific focus become a language. This symbolic language will create a script that our higher cosmic mind will need in order to build our body of light. Understanding our own ideographic and pictographic language of our mind allows us to enter consciously into multidimensional realms, the realms of the soul. As each individual soul awakens to his/her own Soul's energy, translating your own drawings is empowering. This fun and creative and meditative activity can be a great tool to create our body of light, but the ultimate AIM of the mind-drawing course is to become aware of ones Soul Purpose. For many it is their soul purpose to reach for enlightenment.

## These drawing techniques also enable anyone to:

- a) Learn to think differently, combine your creative imagination skills with your natural instinct, ( your sixth sense)
- b) Activate soul memories of your lives between incarnations, Past, Future or Parallel lives and remember your Soul's PURPOSE (these memories are stored in your DNA cellular structure and can only be accessed through your sixth sense)
- c) experience an AHA moment ( through your sixth sense) that will awaken profound revelations, which strengthens your intent.
- (d) Through your meditative analogue mind-drawing from your subconscious, you will start to understand what might be holding you back from experiencing what is lurking in your wildest dreams.

With Love and Light

Nadine May (as Tienieke de Beer )
